

Montclair Breast Center

MONTCLAIRBREASTCENTER.COM (973) 509-1818

One of the biggest benefits for women who are at an increased risk for breast cancer is to have a proactive approach managed by a facility solely dedicated to breast health.

NCCN GUIDELINES: BREAST CANCER RISK REDUCTION

Kruti McDonald, PA

Director, High Risk Surveillance Program

At our high-risk surveillance facility, women enjoy the unique experience of personalized care linked seamlessly to the latest screening, diagnostic and preventive technologies. We're exceptionally equipped to guide you through any breast health decisions, especially taking measures to avoid cancerous developments and finding them quickly, should they occur.

- Risk Assessment
- 3D Mammography
- Breast Ultrasound
- Breast MRI
- Clinical Breast Exams
- Genetic Testing
- Risk Reduction Counseling
- Biopsy & Surgery

Our program helps women understand, reduce, and manage their risk of developing breast cancer.
